PREVENTIVE HEALTH GUIDELINES

Osteoporosis	Discuss prevention and weight bearing exercise with your doctor	All Females: your doctor may consider bone density testing at age 60 for those at risk for fractures and all females should have baseline bone density beginning at age 65
Diabetes		Discuss screening with your physician
Abdominal Aortic Aneurysm		If you have ever smoked, have this one-time-only exam done between ages 65 and 72. The USPSTF recommends one-time screening for abdominal aortic aneurysm (AAA) by ultrasonography in men aged 65 to 75 who have ever smoked.
Tobacco use	The USPSTF strongly recommends that clinicians screen all adults for tobacco use and provide tobacco cessation interventions for those who use tobacco products.	
HIV, Screening	Screen all adolescents and adults at increased risk for HIV infection. Screen all pregnant women	
Alcohol misuse	USPSTF recommends screening and behavioral counseling interventions to reduce alcohol misuse by adults in primary care settings.
